## MARRIAGES

**PRETTY-JOHNSON.**—At the manse, 640 Ninth street south, on July 3, 1912, by Rev. Cameron, Presbyterian minister, Sophie J. Johnson of Watson's Corners, Ontario, to Robert L. Pretty, of Vulcan, Alta. The couple came home Thursday and were met at Champion by Mr. Jonnejohn with his car, and taken to the home of the groom's uncle, John M. Love, where tea was served to about twenty friends and relatives. At home to all friends at Mayview, north of Vulcan.

**JONES-BROWN.**—At the family residence, 647 Broadway, Winnipeg, on June 26, 1912, by Ven. Archdeacon Fortin, Nora Elizabeth, youngest daughter of Mr. Robert Browne, to David Charles Jones, druggist, of Vulcan, Alberta.

The silver cups for the baseball and football games arrived too late for the games on July 1 and will be put up at a later date.

**NOTICE.**—All members of the I.O. O.F. are requested to be present at the next regular meeting, Wednesday, July 10, as there is important business to transact.—A. W. White, N.G.; J. B. Lukens, Sec.

The first 80 miles of the gas main from the wells eastward was satisfactorily tested last week.

### A Three-Year-Old Hero

**Estevan Progress:** Sunday night while playing in the back, the little one-year-old son of Mr. and Mrs. Munro fell into a well, twelve feet deep and full to the top. His little three-year-old brother, with the greatest difficulty and at the risk of his own life, succeeded in pulling him out, but not until he was entirely exhausted and unconscious. Mrs. Munro held the little fellow up and let the water out of his body then applied artificial respiration, while the father drove quickly for Dr. Davis. Due to the mother's splendid efforts the boy was breathing when the doctor arrived, and has by this time fully recovered from his experience.

### Dairy Cows on Easy Terms

**Hon. Duncan Marshall,** minister of agriculture, has just sent up from Ontario several car loads of dairy cows for sale to Alberta farmers. These cows will be sold at actual cost to the department. Arrangements have been made for extending to purchasers a two years' credit if desired. These cows can be seen at the government demonstration farms at Claresholm and Olds. Purchases can be arranged through the managers in charge of these farms.

### FOUND.

—On C.P.R. tracks, a red and white calf was found by the section foreman. Owner may have same by paying expenses.

FRANK ZACK, Foreman

R. Conwell left Saturday for the Spokane district where he has machine interests. He will return in about a month.

## The Observer

When you meet a man from Lethbridge ask him if he ever saw a fly farmer and then prepare.

Twenty-six dead and twenty missing is the final report on the results of the tornado which twisted through Regina on Sunday night, wrecking homes and business blocks and completely leveling all in its path. Every effort is being made to alleviate the condition of the 500 homeless, funds pouring in from all directions. Tents have been erected and martial law declared while exposed property is protected by the mounted police and the local militia who were in camp at Sewall. The lake has been unsuccessfully dragged for bodies of pleasure seekers who were lost when the tornado bore down. Public funeral services are being held to-day. The money loss will closely approach five millions.

What has dry farming to do with a regular weekly rainfall.

**Hon. George Harcourt,** deputy minister of agriculture of the province of Alberta, left Monday morning for a tour of seven states to arrange for the sending of exhibits and delegates to the International Dry-Farming Congress at Lethbridge next October. Mr. Harcourt is the chairman of the board of governors of that organization, and an enthusiast in dry farming. He addressed several congresses in the States, and has made a study of conditions and methods in several states, which has been of great benefit to him in his work with the Alberta department of Agriculture. He will meet the governors of the several states he visits by appointment and also confer with the executive of the International Dry-Farming Congress in these states, visit the several agricultural colleges and experiment stations and address chambers of commerce of the principal cities. His tour will extend over 35 to 40 days.

With the gas already turned into the world's biggest pipe line on Saturday last, and with only a few more miles of the main line to be laid from Bow Island to Calgary, the pipe for which is already on the ground with gangs of men working from early morning and as long as daylight lasts to complete the work, Calgary will be supplied with natural gas next week. The gas was turned into the Bow Island-Lethbridge section, 78 miles in length, and tests made at both ends of the pipe show that the pressure all over the line was the same. The highest pressure reached was 350 pounds, while the lowest was 200 pounds. The officers of the company are well pleased with the results, and will give a demonstration in Calgary on July 15. After that the pipe for service in the towns along the line will be laid and Okotoks will have gas ahead of the contract date.

The local news will be found on the fifth page.

Do not forget the combination sale, to be held at Vulcan on Saturday, July 16.

### FOR SALE.

Five head horses, one fresh milk cow.  
D. F. LEE

MRS. W. W. WILLIAMSON

One of the organizers of the International Congress of Farm Women, who will be a speaker at the Congress at Lethbridge, October 22-26

### SINGLE TAX TROUBLES

**Lethbridge Herald:** The legislature didn't do Barons a good turn when it passed a law enforcing single tax. At least that is the view held there. Barons needed the assessment on land and buildings to raise the necessary revenue. It is claimed that the assessment last year placed the market value on real estate and the council doesn't see where the assessment is to come from upon which to make the necessary levy.

A crisis has been precipitated by the resignation of Councillors Walsh and McKay, who refuse to serve under the circumstances. This leaves the council without a quorum and it is said that no one else will consent to run. The feeling is in favor of appealing to the new minister of municipalities, asking the department to step in and solve the perplexing problem. Barons is one of the finest agricultural districts in the province and with the rain now falling a bumper crop is assured for this year. It is not a question of finance so much as how to adapt the existing civic conditions to the new law. Barons has been borrowing money to make improvements and a larger revenue is needed this year.

### Okotoks Items

The school closed for the current term on Friday. The teachers and pupils take pleasure in the fact that the fall term will be opened in the new building.

Herbert Lemmerman, one of the pupils of Melrose who took the examinations here last week, was thrown from a horse and suffered a broken arm and dislocated shoulder last Saturday.

The union basket picnic of Pine Canyon and Glenview Sunday schools is announced for July 10, to be held on Mr. Channell's farm on the banks of the Bow river. A good program is being prepared and all are invited.

The Calgary fair is a thing of the past. Now get ready for the main show at Okotoks on July 17 and 18.

The gas gang is in town again to complete the connection of the main at the river crossing, near the railway bridge.

### Sale of the Mill

A sale of the Okotoks mill has been consummated by the liquidators, under the winding up act, at \$5,000. The purchaser is the Ellison Milling company, of Lethbridge. The mortgage held by the town of Okotoks will be assumed by the purchasers. The mill will again be in operation within a month, and the activities will be greatly appreciated in this district.

The celebration at Champion was a grand success in more ways than one. To start with the weather was ideal for a day's outing and the crowd from the country as well as from the surrounding towns was in the best of spirits after the dandy rain of last week. Vulcan surely got her share of the prizes as our ball team won \$50.00, Mr. Fearly won \$10.00 on his dray team and Howard Journey won one race with the little roan pony. One of the most enterprising features was the float of Percy Watson, hardware and furniture, which was hard to beat.

## THE SAMPLE MARKET

## How it Will Increase the Car Shortage

From time to time the grain growers of Western Canada are faced with problems affecting the disposal of the products of their labor. Questions that require the most careful consideration. To come to a satisfactory conclusion on these vexing problems demands a thorough investigation of all the possible results which would arise from the adoption of the proposals made. To often the actual results of the operation of the proposed schemes are obscured by parties interested in securing pecuniary advantages.

Such a scheme is the one now before the Western grain growers, in which an effort is being made to establish a sample market for the handling of grain. The imaginary benefits of such a market are extolled while the injuries that would result from it are utterly ignored. Chief among the faults that may be found with the proposed scheme is the greater length of time which would be consumed in conveying the grains from the point of shipment to the lake front.

Every farmer knows the value of the rapid transit of grain from the farm to the market. The present cry from one end of the country to the other is that the railways are too slow in moving the crop. There are too few cars and insufficient motive power. And yet the establishment of a sample market would further lengthen the time of transit and lessen the abilities of the railways to handle the crop.

Next fall, one of the railways will be hauling into Winnipeg at least 500 carloads of grain every day. Should a sample market be established the grain would be sold by separate carloads in sample, and ordered out on time. The whole railway yard cannot be switched to pick out a particular car as each order is received, so that there will have to be a rule to start switching cars every night after five o'clock. This means, therefore, that a car of grain reaching Winnipeg after eleven o'clock on Saturday morning would not start to be switched until after five o'clock on Monday evening, as the grain would not be disposed of at the grain exchange before Monday.

Cars that reached Winnipeg before eleven o'clock Saturday morning and were switched Saturday evening would be shipped on Sunday. But on Monday there would be no grain moving out of Winnipeg. That means that practically no grain would be shipped out of Winnipeg for twenty-four hours each week. The same thing would occur on Thanksgiving Day and the other holidays.

Making the very best allowances it means that one day in every seven would be lost, and as there are only seventy-seven days in which the crop moves, which would include eleven Sundays and at least one holiday, it means that the ability of the railways to move the crop would be lessened by twelve days out of seventy-seven, or roughly speaking, the transportation facilities of the railways of the Northwest would be cut down by at least sixteen per cent.

Then, taking into consideration the glut that would take place at the lake front through the rush of grain there in the first part of the week owing to the hold up at Winnipeg over Sunday, it is not an exaggeration to say that the power of the railways to move the crop would be reduced by twenty-five per cent.

The agitators for a sample market are saying that the railways should add to their rolling stock and yard facilities. But every man who exercises common sense knows that notwithstanding their heavy expenditures and every effort they were able to make the railways have been barely able to keep up with the large increase in the crop produced in the West. It is apparent, therefore, that if the railways are hampered in their movement of the crop to the extent of twenty or twenty-five per cent, that the grain blockade will be worse than ever before.

The western farmer is well aware that a grain blockade always works to the detriment of those who raise the grain and to the advantage of those who buy grain and hold it in their elevators. The results of the grain blockade of last fall are still felt in the West. Let the farmers consider the results of a blockade twenty-five per cent worse than the last one before they consent to the establishment of a sample market and its attendant evils.

## First Thimble

There is a tradition that a Dutch silversmith pondered over a certain notion which he had cherished long and silently in the slow working senses which he deemed his brain—a notion for a trinket, a fad, for a dignified lady of Holland. It must be a useful trinket, albeit a costly one, meet for so good a seamstress as Dame Alice Van Benschoten. When the notion took definite shape, the thing was quickly wrought in precious metal by fingers as deft as the brain was slow, and the industrious housewife proudly wore not only the first thimble, but the first thimble possessed by any Dutch frau.

## Pointed and Pointless

Thomas, said mother, severely, someone has taken a big piece of gingerbread out of the pantry. Oh, Thomas, she exclaimed, I didn't think it was in you. It ain't, said Tommy, part of it's in this.

## Save Something

This is a dreadful downpour. Yes, and my umbrella is far too small to shelter your picture hat. Well, try to hold it over that velvet bow, anyhow.—Kansas City Journal.

## A Changed Man

Mrs. Knagg—You were a different man when I married you. Mr. Knagg—I sincerely hope so, for this I was a fool.—Boston Transcript.

## PRIMITIVE SURGERY

## Some Prehistoric Skulls Show Evidence of Trepanning

There is no doubt that some rough form of surgery must have existed from very ancient times, but it is strange to find that so complex and delicate an operation as trepanning is one of the oldest.

So far as actual report goes, Hippocrates gives the earliest account. He wrote treatises on fractures, dislocations, and wounds of the head, in which he described the method of procedure to be followed in case of a fractured skull. His direction was to cut away a piece of bone, so that the pressure on the brain might be relieved.

There are also records about this time and later of a file being used for this purpose, which at a time when anaesthetics were undreamed of, must have been, to say the least, painful.

According to Dr. T. Rice Holmes, the operation of removing the pieces of bone was performed long before historic times. The effects on the skull were easily seen after death, and are visible so long as the bones are preserved.

From inspection of certain skulls of the later stone age in ancient Britain, Dr. Holmes has come to the conclusion that some of these had undergone an operation which must have been performed with a stone implement.—London Standard.

## Big Game

A military aviator, Corporal Gilbert, had a exciting experience recently, while flying over LePuy. The curious thing about the experience was that although the airman was in danger, he knew nothing of it until he grounded. Gilbert was flying fairly low over some fields, when a farmer, taking his machine for a big bird ran for his gun, which was hanging on the branch of a tree, and fired three times at the aeroplane.

The farmer had mistaken the aeroplane for a species of eagle about which there is a superstition in that part of the country that it ruins the crops if it is seen to fly in Holy Week and is not shot.

Corporal Gilbert who had heard the shots and seen the smoke, thought a salute was being fired in his honor, and dropped a handful of pamphlets asking for subscriptions for army aeroplanes. The old farmer was convinced that, although he did not kill the bird he shot some feathers from its tail.

## In Quaker Street

The following quaintly-worded descriptive statements suggest some rooms for improvement.

Advertisement—Wanted, a white girl to cook.

Doctor's Sign—Specialist—all diseases.

Seen in Vancouver "Afternoon tea served at all hours."

Card at pay-deck in a Cafe—Your face is good, but it won't go in the cash register.

Says a Western paper—Miss Zelle Rock is gaining strength slowly, for which her friends feel very thankful.

Advertisement—Comfortable bedrooms, use of sitting room and breakfast.

## To Remove Dust From the Eyes

Small substances like cinder dust, small chips of stone or metal can usually be removed from the eye by simple methods. If the common way of catching the upper lid by the lashes and pulling it away from the eyeball and down over the lower lid does not result in dislodging the particle, try this:

Make a loop of horsehair and pass it under the lid. Sweep from the outside. This will usually clean the eye. If it does not, the upper lid must be turned inside out, which is easy to do, and the particle, which can be seen easily now, removed with a soft handkerchief or piece of cotton.

## So She Showed Him

I want somebody to show me where to unload this coal, said the grimy looking man at the kitchen door. You needn't ask me about that, retorted the young woman; I don't have anything to do with unloading coal; I'm the kitchen lady.

I can't help that, he rejoined. I'm the coal gentleman and the father of three kitchen ladies, one laundry lady, and one chamber lady, and if you don't show me where to put this coal I'll call the woman of the house.

I'll show you, sir, she humbly replied, and led the way to the coal cellar.

## Keeping Out the Wind

Willie was a smart boy, and ambitious. His first job was a post in the local bank.

Well, Willie, asked his uncle one day; How are you going on in business? I suppose you will soon be manager?

Yes, uncle, Willie replied. I'm already a draught clerk. A draught clerk! Good boy, and what are your duties?

I open and shut the windows according to orders, said Willie, and close the doors after people that leave 'em open.

Dear mediums is cleverer ladies! asserted Helene Mueller.

Do you fall for those fakes? we laughed.

Don't call dem. fine females fakes! demanded Mueller.

Why were you stung?

And don't say stung! I went to one. I saw her. She talked me.

What did she tell you?

She said, "Vot's yer name?" and I said Mueller, and den she vent in a transt. Before she come to, she says, "You vos born in Cholimany!"

And I almost felled dead! How could she tell? Py golly, she was right.

## Baby Weighs 127 Pounds

The biggest baby in the world lives on a farm near Ottawa. It is a boy weighing 127 pounds at 26 months, with a chest measurement of 40 inches. His appetite and thirst are in proportion to his size, and the parents are doubtful if they can afford to raise him.

LET  
MOONEY  
DO  
IT

## MOONEY MAKES THE CRISPEST

## CREAMIEST BISCUIT

## "LET MOONEY DO IT"

Thousands of people all over Western Canada are letting MOONEY make their biscuits.

They have found that MOONEY'S BISCUITS are just a little crispier, just a little creamier, just a little thinner, just a little more appetizing.

MOONEY'S BISCUITS are just good enough to take the place of the product of the home oven! Use

## MOONEY'S PERFECTION SODA BISCUITS

Made in the big sanitary factory in Winnipeg.

The biscuit that's good for every meal of every day. In air tight, dust proof, damp proof packages or sealed tins.

## The First Chance

Has your afternoon card club adjourned for the season? No, we have one more meeting. But I thought your president had left town.

So she has. That's why we're having another meeting. She's the only one who haven't had a chance to discuss since she was elected to office. Detroit Free Press.

## The Picnic Girl

She's gold of hair and blue of eye. She never keeps her hat on. And always puts the custard pie just where it will be sat on.—Judge.

Choked for Air. Some little irritant becomes lodged in the bronchial tubes, others gather, and the awful choking of asthma results. Nothing offers quite such quick and positive relief as Dr. J. D. Kellogg's Asthma Remedy. The healing, soothing smoke or vapor penetrates, clears the passages and gives untold relief. Usually it completely cures. It has behind it years of success. It is the sure remedy for every sufferer.

## Dog-Gone

Hooper—Are you still looking for your dog? Cooper—Yes. Hooper—Why don't you put an ad in the paper? Cooper—What's the use—The dog can't read.

## When He Removes His Wig

Gibbs—In a way I've as much as John D. Dibbs—Nonsense! Why Rockefeller has a dollar for every hair on your head. Gibbs—Well, I'll bet I've a dollar for every hair on his head.

## Minard's Liniment Cures Colds, Etc.

Another View of it. Little Florence had a very bad toothache and was crying softly to herself. Her aunt who was a believer in Christian science, went over to the little girl and said: "If you had any faith, dear, you would have no toothache." Florence continued to sob, and between the sobs she replied: "Well, Aunt Grace, if you had my toothache, you wouldn't have any faith.—Judge.

## Painful Proofs

What are you crying about, Willie. One of the boys called me 'teacher's pet,' and I went 'at' told her and she kicked me to prove I wasn't.—Cleveland Plain Dealer.

## To a Finish

Poet (to his wife)—Now let's have a race and see whether you finish your cake first, or I my sonnet.—Fliegende Blatter.

## Pleasant for Boreleigh

Boreleigh—I hope my call has not tired you.

Miss Keen—Oh, no. I inherit a wonderfully strong constitution.

## Won by Degrees

Judge—Dashington seems to have finally made a conquest of that Scadmore girl. Wonder how it all came about?

The first time she saw him she gave him her eye, the next time they met she gave him her arm, it wasn't long before he was holding both of her hands, soon after that he won her heart and she lost her head and gave herself to him completely.

## Green Lobsters

Have you any lobsters. Yes, ma'am. Here's a fresh lot. Haven't you any that are ripe. Those look so green.

## Dr. Morse's Indian Root Pills

are made according to a formula in use nearly a century ago among the Indians, and learned from them by Dr. Morse. Though repeated attempts have been made, by physicians and chemists, it has been found impossible to improve the formula or the pills. Dr. Morse's Indian Root Pills are a household remedy throughout the world for Constipation and all Kidney and Liver troubles. They act promptly and effectively, and

Cleanse the System

## His First Move

It was a shy young man who was once asked to take a class of girls about 15 or 16, which had formerly been taken by a woman. The young clergyman consented, says London Tit-Bits, but insisted upon being properly introduced to the class. The superintendent accordingly took him to the class for this purpose and said:

Young ladies, I introduce to you Mr. Chira, who will in future be your teacher. I would like you to tell him what your former teacher did so that he can go on in the same way. A miss of 16 rose and said:

The first thing teacher did was to kiss us all around.

## A Snappy Age

The young man breezed into the old man's library.

I met your daughter, he announced, at a Fifth Avenue reception. I want to marry her next Friday afternoon at 3.30. She's willing.

The old man turned to his card index.

Which daughter? he asked.

It's Miss Ethel.

All right, said the old man. Make it 4.30 and I'll attend the wedding. I have an engagement at the other hour.

It was so ordered. This is a snappy age.—Pittsburg Post.

As a vermicide there is no preparation that equals Mother Graves' Worm Exterminator. It has saved the lives of countless children.

## Worried

The best man (making arrangements)—And—er—it is kismet to cuss the bride?—Sketch.

What She Will Sometimes Admit

Does your wife ever admit that she is wrong in an argument. No, the nearest she ever comes to it is to say that I'm not as big a chump as I look.—Detroit Free Press.

## Misunderstood

Alice—I like this style of coiffure. You see my hair has a natural part. Tom—You don't mean to tell me that some of it is false.

## AN EXCELLENT REMEDY FOR LITTLE ONES

Mrs. John C. Lepage, Rimouski, Que., writes: "Your Baby's Own Tablets are an excellent remedy for little ones and I always keep them in the house." Thousands of other mothers say the same thing. The Tablets always do good—they cannot possibly do harm. They are the only medicine for children sold under the absolute guarantee of a government analyst to contain no opiates or harmful drugs. They sweeten the stomach, regulate bowels, cure indigestion and promote healthful sleep. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brookville, Ont.

## Not a Welcome Legacy

What makes Flynn look so unhappy.

He fell into a piece of property.

I should think that would make him look happy.

Would you? Well, this didn't happen to be his property, and he fell into it from his biplane and twisted his back.—Judge.

## Loans on Honor

France has an association which advances loans on word of honor of its customers. The fact that most of the loans are promptly repaid is evidence that some people's words are still as good as their bonds.

## Will Keep It Up

I understand your husband is a candidate for office, said a suffragette out west to her sister in the cause. Are you going to support him?

Oh, I suppose so, answered the sister, somewhat wearily. I've been supporting him for the past ten years.—Chicago Record-Herald.

There was a young lady of Siam Who said to her fond lover, Kiam: I refuse to be kissed, But if you insist: Heaven knows you are stronger than I am.

## When You Buy Matches, Ask for

EDDY'S Red Bird

They have a true safety base head, with silent tip. Will never explode if stepped on.

Eddy's Matches have satisfied Canadians since 1861—accept no others.

Sole Canadian Manufacturers THE STANDARD PAINT CO. of Canada, Limited, Montreal, Winnipeg, Calgary, Vancouver.

Pat had a little brown mare, and they were both familiar sights in the town. The mare was lean, blind and lame, but by dint of much coaxing Pat just about managed to keep her to harness.

One day while leading her to water, he had to pass a crowd of loafers.

Thinking to have some amusement at Pat's expense one called out:

Hallo, there's Pat! How much is that mare of your's able to draw?

Begorra, answered Pat, I can't say exactly; but she seems to be able to draw the attention of every fool in the town.

## Trickery

My wife is trying to get all the suffragists to come out and parade in 39c. hats.

What's her idea?

Then she'll appear in a \$50 confection. —Louisville Courier-Journal.

## Beyond his Ken

Townley—How's the new cook getting on? Subbuss—I don't know. She didn't leave her address.

There are nineteen motor life boats in use on the coasts of Great Britain.

W. N. U. 908

# IMPERIAL NAVAL DEFENCE WILL BE DISCUSSED IN LONDON

Premier Borden and Cabinet Ministers Sail for England  
to Attend Conference with Imperial Authorities  
on Questions Effecting the Empire

Ottawa.—The premier and three of his ministers, Hon. Meares, Hazen, Doherty and Pelletier have left for England on their imperial mission. They expect to be absent about two months.

Of most importance among the questions to be considered by the Canadian ministers in London is of course the problem of Canada's co-operation in imperial naval defence.

In this connection the premier and his colleagues, it is understood, are starting out with the intention of dealing in the conference with the imperial authorities only with the broad lines as the fundamental basis of the whole problem so that a carefully matured plan may be evolved later. It is learned on good authority that there is no expectation of evolving any detailed plan this summer either for the creation of a Canadian navy or for direct contribution by Canada of war vessels to the imperial fleet. The first issue to be settled according to the repeated statements of Premier Borden and Hon. Meares, Monck, Hazen, Doherty, Pelletier and others of the ministers, both in public and in private is the question of autonomy.

The government is practically committed to demanding as a permanent basis for the Dominion's co-operation in naval defence, representation

on an imperial council touching the issues of war or peace affecting the welfare of the Empire as a whole. Premier Borden has explicitly stated his belief in the feasibility and necessity for the Dominion if they are to enjoy upon a system of naval defence, "having a greater voice in the councils of the Empire than they have had in past years." Hon. Mr. Doherty, who will be with the premier and Hon. Mr. Hazen in direct conference with the admiralty, says: "The condition precedent to our undertaking to participate in the naval defence of the Empire is that we should be given an effective voice in the governing and determining of the foreign relations of the Empire." The same principle has been practically asserted by most of the other ministers. It would, therefore, appear that this larger principle must first be settled before Canada can expect any tangible effort on the part of the government towards the establishment of a Canadian navy or towards direct contribution.

In addition to the naval question there are also to be discussed with the imperial authorities the final settlement of the proposals for a uniform imperial naturalization law, imperial copyright, reduced Atlantic cable rates, lower postage rates with France and faster Atlantic service, as left over by the late government.

## OPPOSE CHINESE LOAN

The New Republic is Experiencing Trouble on All Sides

Peking.—It is apparent that the forthcoming loan negotiations will be lengthy and arduous. The government is confronted on the one side with violent provincial opposition, which opposes any supervision and on the other by the groups of bankers who desire increased control extending considerably beyond what was required in the case of previous advances.

It is believed here that the government's acceptance of the banker's present proposal would surely bring a violent outbreak on the part of the people in opposition to the loan. The unfavorable reception with which the comparatively mild terms of supervision in the case of previous advances were met, indicates the almost universal sentiment against such supervision. The government officials, however, are confident that some arrangement will be reached, as there is need of funds, particularly for the payment of the troops.

Opposition to the loan has created a dangerous situation which the government realizes requires careful handling. In addition the government is contending against a serious growth of sentiment in favor of provincial autonomy, threatening central control, which is considered essential to the preservation of the nation.

## BLOCKADE IN MONTREAL PORT

Directly Attributable to Strike of Dock Laborers in London

Montreal.—One of the most serious propositions which the Port of Montreal has faced in the history of its existence is the grain blockade now extant.

The blockade is the worst ever experienced and is attributed directly to the London dock workers' strike. The Grand Trunk elevator and the elevator of the harbor commissioners are both filled to the limit of their capacity, and there are not enough ships to relieve them of the grain stored in them. There is no outlet, but through the inlet come lake freighters, which cannot be unloaded. There are at the present time five large freighters lying in the harbor basins.

"So full are the elevators that they can do no more work. The sight of a couple of floating elevators alongside the Tunisian and the Canada alone would indicate trouble, for it is seldom that the ships take on what is known as 'floating grain,' and that is, take on grain directly from lake steamers by the aid of small floating elevators. This is being done in both cases cited.

## IS SUN GETTING HOTTER

Something Wrong With Old Sol—Will Know Effect in 1000 Years

Pasadena, Cal.—The largest sun spot which has been detected within a year, a dark patch on the sun's surface, 10,000 miles in diameter, though its mark on the 17 inch image at the Mount Wilson observatory, measures but a fifth of an inch across, is now under observation at the Carnegie observatory, and has been photographed several times since its appearance last Tuesday.

The question of whether the sun is growing hotter or cooler, and the effect the cooling of the body would have upon the earth is still debatable. It would take us thousands of years to ascertain whether the sun is becoming cooler.

## Not This Year

Winnipeg.—The Grand Trunk Pacific passenger service to the head of the lakes from Winnipeg will not be established this year. This announcement was made from the office of the general passenger agent of the road. The reason given is that it has been found impossible to have the necessary material for the tracks on hand before the fall.

## Beating World on Wheat

Rosneath, Sask.—Seager Wheeler, of Rosneath, producer of the world's best wheat, has a plot of prelude wheat fully headed out. Dr. Saunders, Ottawa, is the originator of the new variety. The grain is twenty-six inches high.

## FOREST FIRES ALONG N.T.R.

Several Bridges Have Been Burned and Thousands of Trees Destroyed

Fort William.—Reports from Superior Junction state that great damage has been done along the line of the National Transcontinental Railway under construction east of that point by forest fires which assumed serious proportions on Monday and since then have swept the northern country. Several bridges, it is said, have been destroyed and thousands of trees have been burned. The work of construction will be held back for some time by the damage and loss of supplies. The damage to the bridges and the loss in trees alone is estimated at nearly \$100,000. For two days the contractors all along the line have kept their men at work fighting the flames, but in spite of their efforts it is said that at least one camp was destroyed. So far no loss of life has been reported. The camps keep well in touch with any parties in the bush and surveyors or prospectors who have been out are stated to be safe.

Several settlers, it is reported, were unable to save their humble houses and buildings.

## SCENE IN BRITISH HOUSE

Labor Member Shrieks at Premier Because Female Prisoners Object to Eating

London.—A wild scene was enacted in the house of commons as the result of the forcible feeding of the suffragettes who declared a "hunger strike" in Holloway prison. George Lansbury rushed forward toward the ministerial benches, shouting at Premier Asquith: "You are beneath contempt; you call yourselves gentlemen, yet you forcibly feed and murder women. You ought to be driven to posterity as murderers of innocent women."

Speaker Lowther ordered Lansbury to be taken from the house. Lansbury shouted: "I refuse to leave while this contemptible thing is being done, while women are being murdered and driven mad."

After a scene of great confusion he was induced by his friends to leave. George Lansbury is a labor M.P., elected for Tower Hamlets, Bow and Bromley, in December, 1910. He is 53 years of age and was a member of the Royal Commission on the Poor Laws.

## For Wireless Weather News

Washington.—A cable message from Chief Moore, of the weather bureau and United States delegate to the International Radio Telegraph Conference in London, says the conference has approved his plan for a wireless ocean weather service. It provides for co-operation between ships at sea and Washington and London or Paris weather bureaus in giving storm warnings to vessels on the ocean.

## CANADA SECURES MANY

FACTS AND FIGURES DEALING WITH IMMIGRATION

Very Interesting Pamphlet Has Just Been Issued by the Department of the Interior, Giving Details of the Results Accomplished by Immigration Department.

Ottawa.—The immigration branch of the department of the interior has issued a pamphlet entitled "Immigration Facts and Figures," which contains statistics for the last fifteen years.

During the last eleven and three-quarter years, 2,118,712 immigrants have come to Canada, apportioned as follows:

Maritime provinces, 89,474; Quebec, 309,422; Ontario, 604,128; Manitoba, 353,100; Alberta and Saskatchewan, 608,965; British Columbia, 240,414; not shown, 12,311.

Of these 835,138 were British, 762,129 were from the United States and 63,401 from continental countries.

During the fiscal year which ended March 31 last, the immigration was 354,237 of which 138,121 was British, 133,719 from the United States and 82,406 from other countries.

Since December, 1902, when the medical act went into force, 8,500 have been debarred at ocean ports; the number in 1911-12 was 972. In addition 5,626 have been deported after being admitted; the number of cases in 1911-12 was 959. Of these 227 were British and 124 Italians.

Inspection of immigrants seeking admission to Canada from the United States was begun in April, 1905; rejected since that date have been: 1905-09, 4,580; 1909-10, 8,997; 1910-11, 15,404; 1911-12, 22,034.

During the fiscal year, bonus was paid on 23,183 British immigrants, or 16.78 per cent; on 2,613 American immigrants or 27 per cent; and on 2,111 continental immigrants, or 2.56 per cent. Eight years ago the proportion was: British 18 per cent, America 8.3 per cent, Continental 81.3 per cent.

The expenditure during 1911-12 was \$1,354,736. Of this \$578,807 was spent in Canada, \$376,726 in the British Isles, \$30,446 in continental Europe, and \$368,655 in the United States.

## To Study Apes

Berlin.—Fried Selenka, professor of Natural History at Munich, who a few years ago successfully took charge of a research expedition in Java, has now been chosen to go to Tenerife on a similar mission. This expedition, which has for its chief object the observation of anthropoid apes, is under the direction of Professor Rothmann, of Berlin.

## Autos in B.C.

Vancouver.—There are 3,580 automobiles in British Columbia, of these 1,769 are in Vancouver and 1,005 in Victoria.

## THE MARKET REPORT

Weekly Grain Letter Supplied by Thompson, Sons & Co., Grain Merchants, Winnipeg.

Winnipeg, June 19.—The week under review has been uneventful in the grain trade. United States markets have been working lower, the closing prices to-day showing a drop of 5c to 3c from where they were a week ago. This has been caused to a certain extent by liquidation in the July deliveries owing to the near approach of delivery day. Then again the winter wheat area shows considerable improvement, new wheat has been received in St. Louis from Texas and Oklahoma, which always causes a bearish feeling at first. The spring wheat crops in Minnesota and the Dakotas and Western Canada are reported to be looking their best at present, but of course the most critical period has yet to be gone through. The decline from June to August is on the average heavy. Whatever the actual outcome, the acres will be frequent, and will carry more or less weight with the general trade. Already there has been some apprehension owing to the cold weather experienced during the past week. Saturday, Sunday and Monday of this week were admitted to be the coldest days ever known in the North-West states and Western Canada for the time of year. In this connection the Free Press states "Slight frosts were reported from a few points, but the very high winds prevented a general freeze. From Friday morning until Tuesday morning the crop had no opportunity to make much progress. On June 15th, 1911, considerable wheat was reported in the shot blade. Now it is generally admitted that even with favorable weather the crop will not be in the shot blade before July 15th and in a number of regions from a month to five weeks of fine, hot weather, with occasional showers, to mature the crop after it is in the shot blade, these conditions indicate that harvest cannot possibly be general before August 20th or possibly 23rd. Should the season follow the lines of last year for July and August this will mean serious damage from frost to large areas of the late sown grain. We do not wish to be pessimistic, for with the right kind of weather from this out the spring wheat crops will make reasonable progress, as the wheat plant in the North-west has remarkable recuperative powers, but it is well to bear in mind the above facts when considering crop conditions. British and Continental markets have been firm and steady on the continued good enquiry from France for cargoes in all positions. French wheat reserves are low, which is borne out by the fact that during the past week the duty has been suspended. World crop conditions for the week are generally favorable. Warmer weather is desired in the United Kingdom. In France there are some complaints of dry weather. Crop outlook and weather in Germany is good. Hungary and Roumania outlook is good. There are some complaints from South-West portions of Russia, but in the East conditions

are favorable, although a little backward. Weather conditions in India, Australia and Argentina are favorable for the seeding of the new crops. World's shipments were larger than anticipated at 14,768,000 bus. compared with a total of 15,800,000 bus. previous week, and 10,960,000 bus. in 1911. The amount on ocean passage decreased, 1,928,000 bus. and is now 54,962,000 bus., or 4,624,000 bus. more than reported a year ago. The European visible decreased 252,000 bus., against a decrease the previous week of 2,240,000 bus., the total being 97,100,000 bus. Last year there was a decrease of 4,700,000 bus., when the total was 83,100,000 bus. The United States visible supply decreased 2,042,000 bus., and totals 50,673,000 bus., including bonded wheat. Last year the decrease was 32,800 bus., and totaled 27,348,000 bus. There was a decrease of a little over 1,560,000 bus. in Canadian visible, but the total Canadian visible is still more than double that of last year at same date.

The Winnipeg market has been holding firm, being influenced by the firmness in European markets. Fluctuations are narrow, and to-day's closing figures for both cash and futures are about 1/4c higher than they were a week ago. Demand for No. 1 and No. 2 Northern is fairly while for No. 3 the demand is good. There are moderate enquiries for all the lower grades, with the exception of feed wheat, for which there has been practically no enquiry. Receipts are running considerably heavier than last year, but an increasing percentage of the grades show the grain to be out condition, the result of the wet fall and backward threshing operations. Stocks in terminals at the head of the Lakes while still heavily in advance of last year are steadily shrinking before the heavy outward movement. Today's cash prices are: 1 Nor. \$1.07; 2 Nor. \$1.04 1/4; 3 Nor. \$1.00 1/2; No. 4 wheat, 89c; No. 5, 75c; No. 6, 66c; No. 2 Alberta Red Winter, \$1.00 1/2; 3 A.R., 99c; No. 4 A.R., 90c. Futures closed July 1, 97 1/2; October, 97 1/2c.

## Oats.

Have turned easier again, and prices are 1c lower. The higher grades are not in demand, but there is still a fair demand for the lower at reduced prices. The first trade in October oats was made to-day at 38c. To-day's values are No. 2 Canadian Western, 44c; 3 C.W., 42c; Extra 1 Fd., 43c; 1 Fd., 42c; 2 Fd., 40c. Futures closed July, 44c; October, 35c.

## Barley.

Buyers are at last beginning to take notice of this grain, and during the last couple of days there has been a limited enquiry for No. 3 and No. 4. If the enquiry continues we look for prices to advance. To-day's prices are No. 3, 55c; No. 4, 50c.

## Flax.

The flax market has turned dull again, and prices have declined 4c to 5c per bushel. To-day's prices are No. 1 Northwestern, \$2.08; 1 Manitoba, \$2.04; Rejected, \$1.90. The July futures closed at \$2.07.

All prices quoted above are based on delivery in store Fort William and Port Arthur.

## AN ARTISTIC TREAT

Two Splendid Attractions for the Winnipeg Exhibition

Henrietta Crossman and her great success, "The Real Thing" that has been running at the Maxine Elliott Theatre in New York since the middle of last summer, will be seen at the Walker Theatre for three nights starting Monday, July 8.

"The Real Thing" will need no introduction to local theatregoers. Its reputation has already preceded it. No doubt many from this city have seen the production in New York and have reported to their friends what a popular play it is.

Miss Crossman is coming with her New York cast and production and the cast will include those two wonderful children now with the play, Mac Macomber and Allen Morrison.

With the coming of the Fair time Manager Walker will bring the comic opera production that is considered to be the most fascinating of the American theatrical year, "The Spring Maid." This merry work of Viennese melody and gay romance has proven so charming that it has successfully accomplished the remarkable feat of playing twice over the length and breadth of America in a single season in response to the demand for a second hearing. Werba and Luescher, who present this opera have done much in making this possible in practically holding intact the organization of singers and players that has been so greatly praised and in again presenting Fraulein Mizzi Hajos, the little Hungarian prima donna of charm, at the head of the company. They have also done the unprecedented thing in giving a big organization a new costume and scenic dressing in the middle of a season, and the costumes to be seen at the Walker Theatre upon the return of "The Spring Maid" are gorgeous reproductions of the famous dresses worn in the brilliant London production of the opera.

There have been changes and additions to the great singing chorus that it may live up to its reputation as the most remarkable of modern choruses, but the important change is that Charles McNaughton has been brought from England to play the role of the quaint comedian and bring forth the rollicking humor of the part as he did across the seas.

George Leon Moore as the dashing Prince Aladar; Dorothy Maynard, the mischievous Annamit, Jack Rafael, Tillie Salinger, Ralph Newman, Louis Miller, Dorothy La Mar, and others of the long cast, will come again in their former merry parts, please as before.

Getting at the Facts  
Calgary, Alta.—The Panama Canal conference, the centre of interest at Calgary this week, is leading to the tabulation of much important information bearing upon the present opportunity of the West, and especially of Alberta. The Canal will mean to this province in freight rates for grain at least 9 cents per bushel, to say nothing of an all-year-round seaport. In the meanwhile it will be open to the wheat growers of Central and Eastern Saskatchewan to ship their product east or west as they prefer. With reference to the present situation a well-known real estate man says: "As might be expected in view of the approaching completion of a great achievement, the wall of the pessimist is heard in the land, mingled with the voices of those who know the facts and who accordingly are inclined to take a somewhat hopeful view of the situation. Such views I am content to pass along for what they are worth. Among those familiar with the facts as to the resources and transportation requirements of the Canadian West, this half-bred rhetoric and prattle as to impending disasters from improved transportation facilities will be taken at its face value. The conclusions of the Calgary conference will be worth attending to; and the combined wisdom and judgment of the conference will bring out a number of important aspects of the Panama situation that up to this moment we have been overlooking altogether."

## C.N.R. ACROSS CONTINENT

All Necessary Financing Done, Says Sir William MacKenzie

Montreal.—All the financing has been done for the completion of the Canadian Northern Railway from Montreal to the Pacific Ocean. The proceeds of \$35,000,000 guaranteed by the Canadian Government to build the section from Montreal to Port Arthur are in the bank and seven thousand men are at work hurrying forward the stretch to completion. A splendid hotel will be built in the city of Montreal on a site which the company considers the best in the city.

## These are some of the announcements made recently by Sir William MacKenzie, president of the Canadian Northern Railway, prior to leaving on the Royal George for England.

## NORTHWEST ENCHANTING

Dr. Berube, of New Hampshire Town, Will Sell Out and Move West

East Canada, N.H.—Dr. P. Berube returned from an extended trip in the Canadian Northwest, visiting Manitoba, Alberta and Saskatchewan. He described the country.

He says: "There can be nothing better and it is an ideal country for young people to make a home."

Dr. Berube intends to dispose of his property here and remove to one of the large cities of the Northwest. He will engage in an extensive business.

## Count Von Hammerstein Killed

Winnipeg.—It is reported here through a communication of a friend that Count Von Hammerstein was killed in Paraguay, South America, where he was endeavoring to start a revolution. The count was here last summer after having been in the district north of Edmonton some weeks on an oil exploration trip and from which, it is said, he promoted several oil companies.

## THE SUNDAY SCHOOL

LESSON I.—THIRD QUARTER, FOR JULY 7, 1912

Text of the Lesson, Mark III, 20-36. Memory verses, 28, 29—Golden Text, John III, 19.—Commentary Prepared by Rev. D. M. Stearns.

The lesson is found in Matt. xii as well as in Mark III and is a sample of their treatment of Him whom they should have welcomed as their Messiah, but of whom it is written: "He was in the world, and the world knew Him not. He came unto His own, and His own received Him not" (John I, 10-11). In our lesson, verses 21, 22, it is written that they said: "He is beside Himself. He hath Beelzebub and He out-devils." They frequently told Him that He had a devil (John vii, 20; viii, 53; x, 20), and as early in the record as Matt. xii, 14, it is written that the Pharisees went out and held a council against Him. It was the old story of Ps. lxxxi, 11, "My people would notarken to my voice, and Israel would none of me."

Even in the days of Enoch, the seventh from Adam, we read of the ungodly and their words, and deeds (Jude 15). It is also written that at the end of this age, to which we are fast hastening, there shall be a form of godliness without the power and sound doctrine will not be endured (1 Tim. iii, 1-5; iv, 3). The great adversary, the father of lies, who to Eve questioned the word of God and made God a liar, will yet gather the nations to make war with God's people, Israel, and the Lamb of God Himself, but beast and false prophet shall go alive to the lake of fire and the devil to the bottomless pit (Rev. xvii, 14; xix, 19, 20; xx, 1-3; Zech. xiv, 1, 2).

Like the multitudes who clung to Him when here in humiliation and upon whom He always had compassion, there are multitudes now who would listen to the gospel if they could hear it, but many of the religious leaders of today are as much against the gospel of God concerning His Son Jesus Christ, as were the scribes and Pharisees against Jesus Christ. Those who today believe that Jesus is God, the Creator of all things, who died for us, bearing our sins in His own body on the cross, rose from the dead, ascended to Heaven, and is coming again to set up His kingdom of righteousness and peace on this earth, are accounted unlearned, ignorant, behind the times, narrow and all else that unbelieving words can describe. How utterly foolish seemed their accusation in the light of His question, "How can Satan cast out Satan? (Verse 23). How great and far-reaching His saying in verse 27, "No man can enter into a strong man's house and spoil his goods except he first bind the strong man." The devil is the god of this world, blinding the minds of all unbelievers. The whole world lieth in the wicked one. And it was not wholly an untruth when he said to our Lord as he showed Him all the kingdoms of this world and the glory of them, "All this is delivered unto me, and whosoever I will, I give it." (11 Cor. iv, 4; 1 John v, 19; Matt. iv, 8; Luke iv, 6). Those who talk of winning the world for Christ do not seem to believe these truths nor consider the necessity of getting rid of the devil, but it stands as our Lord said—the strong man must be bound before his goods can be taken.

The unpardonable sin of verses 29, 30, makes us think of 1 John v, 18: "There is a sin unto death. I do not say that he shall pray for it. Let us not forget verse 25 of our lesson, "All sins shall be forgiven unto the sons of men and blasphemies where-withsoever they shall blaspheme," and also 1 John I, 7, "The blood of Jesus Christ cleanseth from all sin."

What, then, can this sin be that hath never forgiveness, but the persistent refusal to listen to the voice of the Spirit, whose delight is to point to Jesus Christ, who alone can forgive sins? As there is "none other name" (Acts iv, 12), if that name is refused or dishonored there can be no forgiveness, but only eternal damnation (verse 30).

As he was told that His mother and His brethren were without, desiring to speak to Him, He stretched forth His hand toward his disciples and said, "Behold my mother and my brethren, for whoever shall do the will of my Father, which is in Heaven, the same is my brother and sister and mother" (verses 21-35; Matt. xii, 46-50). On another occasion He said, "My mother and my brethren are those which hear the word of God and do it" (Luke vii, 21). When a certain one of the blessedness of being His brother He said, "Yes, rather blessed are they that hear the word of God and keep it" (Luke xv, 28). We cannot but think of His words on the last night concerning such as keep His words becoming a mansion in which both He and His Father would dwell. At the same time He told His Father that certain ones had received the words which the Father had given Him for them (John xiv, 23; xvii, 8). I am greatly impressed by the fact that receiving His words made Him so glad that He told His Father of it. How it must grieve Him to have His words treated as many of his professed friends treat them today, seemingly forgetting that all His words were not His, but His Father's (John xii, 49; xv, 10). "We can do nothing against the truth, but for the truth." (11 Cor. xiii, 8).

## Italian Casualties

Washington.—The casualties to the Italian army in the war with Turkey to June 7, were 57 officers and 588 soldiers dead, according to the announcement of the Italian minister of war just received by the Italian ambassador here. These men were killed or died from wounds received in battle.

In addition two officers and 328 soldiers were lost and are accounted for in the greater part by disappearance from the seventh regiment of "Bersaglieri" October 31 last at Schara Sell.

## BONEHEAD BASEBALL

This Was About the Richest Double Play Ever Perpetrated.

Double boneheads are rare in baseball—scarce than hens' teeth, and naturally so, for the completion of a bonehead requires vigilance and quick thinking by the opposition. Still, double boneheads happen ever and anon, the most famous one possibly being that pulled by Coby Dolan and Harry Gessler at Chicago several years ago.

On this occasion Dolan had reached second in the ninth, and one was down, the score at the time being in favor of the Cubs by a one run margin. The next batter batted a long fly over center field. Gessler grabbed the ball and, deciding that it was the third out, tucked the ball in his pocket and flew for the clubhouse.

Dolan, instead of taking advantage of the break to score the tying run, also figured that it was the third out and followed Gessler across the field, while a raving mob of players from both teams, surrounding them, tried to impress the horror of the situation upon them.

Artie Hoffman finally took the ball away from Gessler, chased Dolan to the clubhouse and made the putout at the edge of the bathtub. That was the richest double break on record, but there have been a few others almost as funny.

## What a Man Eats.

Mrs. Babbut—I wonder what's come over Harry. Instead of being cross, as usual, he started off happy and whistling like a bird this morning. Now (a new girl)—it's my fault, mom. I got the wrong package and gave him bird seed for breakfast food.—Woman's Home Companion.

## Disappointed.

Clara—I've been looking like Jack's tin, and I'm awfully disappointed. Mary—Why? Clara—My worst suspicions are unfounded.—Gossip.

## Herb Lennox's Joke.

At two o'clock the other morning there was great excitement in the Ontario Legislature. Herb Lennox was the cause of it all. The budget debate was in progress, and Mr. Lennox sent a note to some of the members that there was going to be a division. As most of the members had gone to their boarding houses, there was great excitement. Telephone calls were hastily put in, and in about fifteen minutes members commenced to arrive in all haste. Some came in taxicabs, some in cabs, some on foot and others on night cars and dressed on the way.

Many of the members rushed into the House minus collars and ties, one came with only an undershirt, and all were anxious to be on hand when the division was called. But there was no division. At two o'clock Mr. Mageau of Sturgeon Falls was still talking. Herb Lennox had disappeared, and the members who had been awakened from sleep were searching for the man who had caused so much excitement.

## Parliamentary Perquisites.

The custom of presenting a leather trunk to each member at the initial session of every Parliament has been re-established.

The internal economy committee of the last House composed of three Cabinet Ministers and Speaker Macleod, passed a resolution suspending the custom after the trunk for the 1908 Parliament had been distributed.

This year's internal economy committee sanctioned a recommendation by the printing committee for going back to the old system, and within the past few days M.P.'s have been making their selection, several alternatives besides trunks being exhibited.

For two sessions there have been no stationary trunks, but it is rumored that the supplementary estimates may provide for them also. From the earliest days, these perquisites have been attached to Parliament.

A willing mind makes a hard journey easy.—Munroe.

## Local News of Interest

Peter Terry is building a new residence on Juno street.

Several parties from Reid Hill were visitors at Calgary fair last week.

Notice the new ad. of H. P. Richardson in another part of the Review. Mr. R. surely believes in advertising.

The rainy spell of last week stopped all building operations here, but they are again renewed with increased energy to make up for lost time.

Nearly everyone from Vulcan went to Champion last Thursday, to celebrate July 4 and all report a jolly good time.

F. D. Rogers was down from Okotoks in the interests of the Review and may bring a plant to Vulcan in the near future.

The first car load of grain put into the new elevator and the first one shipped out of Vulcan from the same was sold by T. M. Davis.

A crew of men came down and put in the new semaphore at the depot, making a needed improvement to the building, to use as well as it looks.

Our thanks are due the weather man for the rain. Champion, Carmangay and other towns south received more than we did, so we must all be thankful.

H. F. Richardson was a business caller at High River and Calgary a few days last week, leaving his hardware and machinery business under the able management of Robt. Polly.

If the Review is not up to the standard this week kindly remember that Dominica day is only just over and we are still boys when it comes to celebrating the anniversary of our nation.

The editor had a fit on Tuesday. A gentleman came all the way from Olds to settle an account. The phone agent made the change and stuck to the editor's share. The editor had another fit.—Trochu Tribune.

This is a bad season of the year for typhoid and we would warn everyone to be as careful as possible about drinking water that is not absolutely pure and fresh, as well as using every care about clean yards, etc. It is much easier to keep clean than to clean up.

Much credit for the celebration at this place is due Mr. Shimp, as after the collection committee had canvassed the town, he came along and raised upwards of \$100 more to be used in prizes, etc., and that too in the face of this being a busy season for hail insurance.

A project is on foot to have a market day in Vulcan the last Saturday of every month, when anyone may bring in anything they care to sell, and list same with the secretary, when, on the appointed day, all will be sold at a small commission. Let us have your views on the matter, for or against, as soon as possible. Register your kicks at the office of the Review.

On Wednesday, June 20, Mr. D. C. Jones was united in the bonds of holy matrimony to Miss Nora E. Brown, of Winnipeg. The bride is a very highly respected young lady in her home town, and the groom is our genial dispenser of drugs and is too well and favorably known for us to make any comments. The Review joins in a hearty welcome to Vulcan and best wishes for a long, happy and prosperous life for the young couple.

Carmangay Sun: A man by the name of Dwyer who has been working as a cook for the C.P.R. ballasting outfit now located at Carmangay has been stealing goods from the cook car and selling them to one of the Chinese restaurants in town. He has stolen in all about \$75 worth of goods, most of which were seized by the police. Dwyer has made his get-away and is supposed to have gone to Lethbridge.

## BIRTHS

PRINCE.—To Mr. and Mrs. Plumb, on June 30, 1912, a daughter.

## People Who Come and Go

Miss Irene Pratt was a Calgary visitor during the fair.

G. M. Whicher passed a few days at Nanton the past week.

Rev. Deaton, of Cayley, was a guest of Rev. D. K. Allan a few days last week.

Dr. Carson has taken rooms over the new hardware and will stay in Vulcan.

Mrs. Beardsley is much better and we are informed she will soon be out of the hospital.

Wm. Bash has rented his property at Nanton and, after a few days' visit with friends at Vulcan, will leave for Spokane.

Mrs. Peterson, of Bowville, was visiting friends in town the past week. She reports crops much better around Vulcan than any she had seen this year.

Mrs. (Dr.) Brown, of Cayley, was visiting her sister, Mrs. F. Elves, a few days last week and Dr. Brown and Ed. Elves drove through from Cayley and passed the first at Vulcan.

## WILSON

On the 46th ballot, at the Baltimore convention, Governor Woodrow Wilson, ex-president of Princeton college, was chosen as the democratic candidate for president. The vote stood: Wilson 900, Clark 84, Hermon 12. With a wide split in the republican ranks and a general dissatisfaction, Wilson's chances are better than those of recent candidates of the party.

## JULY FIRST

Well, it's over.

The weather man seemed determined to shut out our celebration on July 1 and gave us some very nasty weather for a few days before as well as on that day, but the way in which our boys went after things made a creditable showing regardless of the weather conditions.

Two ball games resulted in a tie with Brant and Loma against Vulcan, and the game with Champion turned in favor of the home team.

About \$200 was given away in prizes and all seemed to be satisfied with the way in which the races were conducted and the prizes awarded.

The Ladies' Aid society, the R. N. of A., the Catholic ladies and Peter Terry served refreshments on the grounds, and D. F. Lee and C. B. Shimp had stands in town.

In the evening there were two dance halls in full swing until the wee, sma' hours.

D. F. Lee made great preparations for a bowery out the weather man was unkind and beat him to it.

In the bucking contest, C. J. Christianson won \$30 and S. Taylor \$15.

Taking everything into consideration we are well pleased with the way everything was handled for the size of the crowd.

## ESTRAY NOTICE

\$10.00 reward for information leading to the recovery of one bay gelding branded 96 on right shoulder. One yearling gelding, light bay with no brand, and one sorrel mare with brand on right shoulder, not plain. Return to or write

JOHN KNETTLE,  
Vulcan.

**THE OLIVER 1-GANG PLOW**

Good to look at—better to own, because it is the best and most scientifically constructed gang plow on the market.

Let it work for you.

The exclusive "water draft"—with no side draft—is what does the business.

We will be only too glad to tell you all about it. Come in soon or, better yet, write.

## PSORIASIS WAS CURED

After Five Years of Suffering—  
Three Doctors Failed and Said  
Case Was Incurable

Itching and Burning Was Terrible  
Until Relief and Cure Was  
Effected by

### DR. CHASE'S OINTMENT

Psoriasis is another name for chronic eczema. It is the worst form of this dreadful itching skin disease. Once eczema has reached this stage it is usually considered incurable.

But here is a case which proves again the wonderful healing power of Dr. Chase's Ointment. Not only does relief come quickly, but the resulting benefits are thorough and lasting.

Mrs. Nettie Massey, Concession, Ont., writes: "I thought it my duty to write you telling you the great benefit I received from using Dr. Chase's Ointment. For five years I suffered with what three doctors told me a cure for \$50.00 to keep my money in my pocket; as I could not be cured. 'The disease spread all over me, even on my face and head. The itching and burning was hard to bear. At last my brother read in the paper about Dr. Chase's Ointment as a healer. I used 8 boxes, and I am glad to say I am entirely cured, not a sign of a sore to be seen. I can hardly praise the ointment enough, and you are at liberty to use my testimony, as I hope thereby to induce other sufferers to try the same.'"

Dr. Chase's Ointment 60c. a box at all dealers or Edmondson, Bates & Co., Limited, Toronto.

#### It Often Happens

How did you happen to lose your girl?

I entertained her so lavishly while we were engaged that she acquired expensive tastes. Then she wisely declared that she would be unhappy with anybody but a millionaire, which I wasn't.—*Courier-Journal*.

#### Discovered

You look down in the mouth. Don't allow yourself to get too much out of your girl throwing you over. I'm not worrying over that. But she sent me back my engagement ring marked 'Glass! Handle with Care!'

#### Modern Version

Teacher:—The poem we have just read speaks of the "battered wail." Mamezia, can you tell me what a "battered wail" is?

Mamezia:—Yes'm, it's a girl or lady what butts in.

#### Few and Far Between

Pa, why do they call this strawberry shortcake? Because the supply of strawberries used in it is so short.—*Detroit Free Press*.

A gentleman who was once stopped by an old man begging, replied: Don't you know, my man, that fortune knocks once at every man's door? Yes, said the old man, he knocked at my door once, but I was out, and ever since then he has sent his daughter.

His daughter? replied the gentleman. What do you mean? Why, Miss Fortune.—*Flashlight*.

Willie, said the mother sorrowfully, every time you are naughty I get another gray hair. Gee! said Willie: you must have been a terror. Look at Grandpa.—*Ladies Home Journal*.

## THE BLESSING OF MOTHERHOOD

### Healthy Mothers and Children Make Happy Homes

Motherhood is woman's highest sphere in life. It is the fruition of her dearest hopes and greatest desires; yet thousands of noble women through some derangement have been denied this blessing. In many homes once childless there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal, healthy and strong. This is evidenced by the following letters which are genuine and truthful:

London, Ont.—"I wish to thank you for the benefit I received by taking your famous medicine, Lydia E. Pinkham's Vegetable Compound. Before my baby was born I was so ill I could not stand long or walk any distance. I had to lie down nearly all the time. After I took your medicine I felt like a new woman. I could work from morning till night and was happy and well. I certainly think it relieves pain at childbirth and recommend it to every woman who is pregnant. You may use this testimonial if you like. It may help some other woman."—Mrs. FRANK CORBIN, 132 Adelaide St., London, Ont.

Brooklyn, N.Y.—"I was ailing all the time and did not know what the matter was. I wanted a baby but my health would not permit it. I was nervous, my side ached and I was all run down. I heard that Lydia E. Pinkham's Vegetable Compound was good and took the medicine. I have now a beautiful baby and your Compound has helped me in every way."—Mrs. J. J. STEWART, 290 Humboldt St., Brooklyn, N.Y.

W. N. U. 908

#### TO CONSERVE MOISTURE

Written by E. M. House, Engineer  
Colorado Experiment Station,  
Fort Collins, Colorado.

It is a well known fact that ground which is kept loose on top will evaporate much less water than a soil which is packed on top. The moisture which escapes into the air is absolutely lost so far as the plants growing in that particular field are concerned, and if anything can be done to hold this moisture in the ground so that it may reach the roots of the growing crop, it is of course the thing to strive for, and will prove a benefit to the plant growing in the field.

Some years ago one of the representatives from the Agricultural College was visiting an up-to-date farmer in the country, and the farmer showed him a field of wheat which illustrated this harrowing in a remarkable manner.

A storm had passed over that section of the country and about one and a half inches of rain had fallen. It had been a dashing shower and had packed the surface of the ground considerably. The grain was from four to six inches high, and the farmer had been advised to harrow the ground to prevent evaporation. He sent his hired man to do the work, who hitched on to the harrow and dragged it diagonally across the field of wheat, and then around the outside of the field some five or six times. He then became disgusted with the work because it appeared that he was dragging out so much of the grain and reported the fact to the farmer who ordered the work to be discontinued.

At the time the grain had headed the marks of the harrowed sections could be plainly seen. The place where it had been dragged diagonally across the field produced grain at least eight or ten inches higher than that on either side which had not been harrowed, and along the edges of the field the grain was in a like condition. The grain of the field that had not been touched by the harrow was not to be compared with the harrowed grain, either in appearance, size of plants or heads of grain. The yield from the harrowed portion was practically double that from the unharrowed portion.

It simply shows that the harrowing and loosening of the surface soil, even though it did destroy some of the plants, conserved the moisture and benefited those plants that were left in such a marked degree that it materially increased the yield from that field, and shows that this practice could be employed to advantage by all farmers.—*Dry Farming*.

#### One on the Clerk

Captain Thomas Benet, who manages the mile-long seine at the famous Gloucester Beach fisheries in the Delaware, south of Philadelphia, says most big fish are weighed, as a friend of his once said.

My friend, he states, was taking a walk one morning after a severe illness. As he trudged along he saw an acquaintance, a coal dealer, standing beside his scales.

Just give me my weight, will you? asked my friend. I would like to see how much my illness has pulled me down.

Weight, Bill! called the dealer to the clerk inside.

And then the clerk, thinking that a ton of coal had been carted on the platform, sang out: Twenty-four hundred just.—*Washington Correspondence*, New York World.

#### A Disadvantage

While awaiting the coming of her friend, the mother, a visitor to a Baltimore household, was holding a desultory conversation with one of the little girls in the drawing room.

Where are your two little sisters? the caller asked.

Oh, they observed the little girl, with an air of one upon whom the responsibilities rest heavily—they're out somewhere to have what mother calls mischief, and what they call fun.

And why didn't you go to share in the fun? asked the caller.

The child sighed. Mother trusts me so dreadfully, she explained, that I can't have much fun.—*Lippincott's*

#### Labelled the Label

Paintings were not her specialty, but as she gazed at a beautiful copy of Millet's *Gleaners*, her admiration of the work called forth enthusiastic comment. What a wonderful picture, she exclaimed. And how natural it looks.

But what are those people doing? she inquired, as she bent nearer to read the title. Oh, yes, I see, gleaners! How perfectly fascinating!

#### Simple English

The Frenchman asked the American sparmaker what he was making.

A yard, was the reply. How much have you got done? was the next question.

A yard.

Where did you get the spar from? The yard.

And the Frenchman was very much surprised at the lucidity of the answers and amazed at the simplicity of our language.—*Christian Register*.

#### When the Mercury Starts

Brown—So you're living in the country, eh? I suppose you get up with the chickens?

Green—Haven't any chickens. I get up with the thermometer.

#### The Lesser Half

Henpecked Husband—Is my wife going out, Dora?

Dora—Yes, sir.

Henpecked Husband—Do you know if I am going with her?—*Satire*.

#### Proved Worthless

Skinflint—I have no money, but I will give you a little advice.

Beggar—Well, if yer hain't got no money yer advice can't be very valuable.—*Christian Advocate*.

#### Expects

Hobson—So you've bought a piece of property at Marshville. How does your land lie?

Johnson—Not nearly so well as the agent who sold it to me.

## COCKSHUTT FROST & WOOD BINDERS

Meet the hardest conditions of cutting and binding. Do the work well.

#### 50,000 Unclaimed War Medals

In two large strong rooms at Woolwich Dockyard, Woolwich, Eng., are stored nearly 50,000 unclaimed South African medals. Each is engraved with the name of the man to whom it was awarded. These men are not now with the colors, but a staff of clerks and a department armed with medal lists and regimental records are endeavoring to trace them.

Many of this lost legion are irregulars who flocked to the British colors when war broke out, but who have since become scattered all over the world. One young man, for instance, after the war, went prospecting in Capetown after an absence of nearly ten years and asked for his medal. It was given him. Similar demands from all parts of the British Empire are received nearly every week.

Hundreds of medals have been reposing in regimental safes since 1904. At the end of ten years, according to the King's regulations, those still unclaimed will be broken up and the silver debited to the mint. Many men have refused the medal on the ground that it is 'too cheap.' Three-quarters of a million of the medals were struck—a fact which may have been strictly regarded.

But these South African awards are not the only medals at Woolwich awaiting claimants. There are 4,000 medals (with names engraved) for the Zulu campaign of 1879-80, and also seven medals presented by the British South African Company for the Matabele campaign. Claims for the Crimean and Indian Mutiny medals are still made. On an average the India office give away twelve Mutiny medals a year, while the war office bestows one Crimean medal a year and replaces about ten lost medals.

#### Minard's Liniment Co., Limited.

Dear Sirs,—This fall I got thrown on a fence and hurt my chest very bad, so I could not work and it hurt me to breathe. I tried all kinds of Liniments and they did me no good. One bottle of MINARD'S LINIMENT, warmed on flannels and applied on my breast, cured me completely.

C. H. COSSABOOM,  
Rosaway, Digby Co., N.S.

#### Contents of a Man

An average man of 150 pounds contains the constituents found in 1,200 eggs. There is enough gas in him to fill a gasometer of 3,649 cubic feet. The iron in him would make four tennpenny nails. His fat would make 75 candles and a good-sized cake of soap. His phosphate contents would make 8,064 boxes of matches. There is enough hydrogen in him in combination to fill a balloon and carry him above the clouds. The remaining constituents would yield six teaspoonfuls of salt, a bowl of sugar, and ten gallons of water. The foregoing analysis is made by the Practical Druggist, which adds that a man has 500 muscles, about 1,000,000 cells, 200 bones, 4 gallons arteries and veins, more than 25 feet of intestines, and millions of pores. His heart weighs from 8 to 12 ounces; its capacity is from 4 to 6 ounces in each ventricle, and its size is 5 by 3-1/2 by 2-1/2 inches; it pumps 22 1/2 pounds of blood every minute, 16 tons in every 24 hours, about 5,840 tons a year. In a fully developed, healthy adult it beats about 72 times a minute.

The change of dietary that comes with spring and summer has the effect in weak stomachs of setting up inflammation, resulting in dysentery and cholera morbus. The abnormal condition will continue if not attended to and will cause an exhaustive drain on the system. The best available medicine is Dr. J. D. Kellogg's Dysentery Cordial. It clears the stomach and bowels of irritants, counteracts the inflammation and restores the organs to healthy action.

#### Manager Wives

A well known doctor, who claims that Canadian motherhood is the highest type in the world, was asked if this was not partly due to the unusual amount of responsibility the Canadian husband allows his wife in family affairs.

Quite true, the doctor replied. The confidence her husband places in her makes the Canadian mother capable and self-reliant. The mother's share in a family's success or failure is a large one—much larger, indeed, than most men will acknowledge.

I see by the papers, a friend once said to me, that Footlights is traveling under his wife's management. So do most men, I replied, but they don't advertise it.

#### Why the Bulldog

Waitah, said Colonel Clay, as he glanced around the dining room of the big hotel, you all can bring me a Kentucky breakfast.

And what is that sir? enquired the waiter.

Bring me a steak, a bulldog and a quart of bourbon whisky.

But why do you order a bulldog? enquired the waiter.

To eat the steak, sub, replied the colonel.—*Cincinnati Enquirer*.

#### A Difference

Is your brother running for office? He was, but the newspapers have him on the run now.

#### Naturally

Was Jimmy Jinks angry at the result of his interview with Jenny Blink's father?

Well, he did say he felt quite put out.

#### PROGRESS OF CREMATION

Over Four Hundred Cremations at Montreal

The British Medical Journal in a recent article on the progress of cremation gives figures showing the growth of this method of disposing of the dead in Europe.

The total number of cremations in Great Britain during 1911 was 1,023, which shows an increase of 177 as compared with 1910. Since the opening of the Working Crematorium in 1885, there have been 9,984 cremations in Great Britain. At the present time there are 13 crematoriums in Germany, six of which started operations last year. A law has been recently passed permitting cremations in Prussia.

In Switzerland there are now ten crematoriums, three of which belong to the municipalities of Basel, Geneva and Zurich. There were 1,210 cremations in Switzerland in 1910.

There are about forty crematoriums in the United States, twenty-eight in Italy, five in France, four in Sweden and Norway, two in Russia, one in Denmark, and one in Montreal, Canada.

The beautiful crematorium in Mount Royal cemetery at Montreal was opened in 1902 and up to the close of 1911, 401 cremations took place there.

No matter how deep-rooted the corn or war may be, it must yield to Hollo-way's Corn Cure if used as directed.

#### Pretty Smart Work

Residents in rival cities, Jones and Brown were bragging hard about the excellencies of their respective homes.

Take our fire brigade, said Jones, after an hour's heated discussion. Do you know, the other day a fire broke out in our town, and within three minutes the engine came along, but it was going so fast that the driver couldn't pull up till he was a mile past the burning house?

Brown smiled in a superior fashion.

My dear fellow, that's nothing, he said. One day two men were working on a church steeple in my city, and suddenly one of them slipped. A terrible death would have been his, only fortunately, a spectator had the presence of mind to call the fire brigade on the telephone, and they came just in time to catch him in a blanket.

#### Extermination of Rats and Mice

If it were generally known that there is no trouble to rid a house, barn or any building of rats and mice by the use of Gillett's Lye, it is doubtful if the article could be made as fast as it would be used for this purpose alone. The process connected with using it is very simple, the plan being to sprinkle a little of the article in and around the holes made by these pests in floors, partitions, etc. In addition to this it is well to use a thin piece of board about a foot square, or even smaller, and make a complete circle of the Lye on the board about a quarter of an inch deep, and inside of the circle place some meat or cheese. In endeavoring to get at the bait the feet of the rats and mice will be burned and the whole colony, whether large or small will immediately disappear from the premises.

The plan is worth trying, but the good kind—Gillett's Lye—should be procured. Refuse the many cheap imitations and substitutes.

#### The Wedding Gift

The bachelor community of a certain suburb were greatly scared by the advent amongst them of a fearsome type of the desperate, husband hunting spinster. After throwing each of the bachelors into a state of terror, lest he should be the recipient of her attentions, the lady finally captured the curate.

Local bachelordom was so intensely relieved at its escape that it united in presenting the curate with a splendid wedding present in the shape of a costly table-service. The curate was overwhelmed. "Such a magnificent gift!" he gasped.

Well, you see, my boy! exclaimed the chief of the local bachelors, it is really our thanksgiving service.

#### Minard's Liniment Cures Garget in Cows.

#### Silly

Johnny—OO-oo! Earle Dobbs punched my nose when I wasn't looking.

His Pa—What? Where were your eyes?

Johnny—He told me to close them a minute.

#### Of Course

Teacher—The burglar leaped through the window as the detective entered the room. How would you punctuate that sentence?

Bright Scholar—Make a dash at the burglar.

#### Good Cheer

The vegetable days have come, With garden sals complete

Enabling us to laugh a lot At the awful price of meat.

#### Baltimore Sun.

Father—It's very strange, but when I want you to marry a man you object, and whenever I forbid you to marry a man you insist upon it.

Daughter—Yes. And when we are both agreed, the man always objects.

#### What He Objected To

Visiting Chaplain—Ah, my brother, this world is full of trials.

Prisoner—Oh, dry up, guv'nor! Think I dunno that? It ain't the trials I mind, it's the verdicts.—*Sketch*.

## AGRICULTURAL IMPLEMENTS

#### Labor Saving Device

Inquisite—Say, stranger what kind of ammunition do you use in shooting frogs?

Andy—Pepper and 'salt—seasoned when you shoot them. Father bought a Rubens when we were in Europe last summer. Really! What horsepower?

#### A Carping Friend

A college offers me a degree for a million.

Do you want to be a college youth? No, but I'd like a degree.

Oh, why spend all that money? Join the Boy Scouts.—*Courier-Journal*.

#### A Bad Break

Hostess—Do have some of my cake, Mr. Hookins. I don't believe you've ever tasted my own make.

Guest (aiming to be polite)—Indeed I have and I assure you I did not wish to eat anything else for days after.—*Boston Transcript*.

#### Plain Speaking

Why, it's as plain as the nose on your face.

Well, anyhow, it ain't as plain as the face behind your nose.—*Tattler*.

#### The Difference

Bees—What's the difference between a bird with only one wing and one with two?

Bees—I give it up.

Bees—Merely the difference of pinion.

#### When Holidays Begin

As you pack your bag or trunk going on a holiday keep account of the articles you take with you. Whether you start for home you will then know whether or not you have lost or mislaid anything. And should the baggage miscarry or get lost or damaged in any way a list of your belongings will be most helpful in settling matters.

Mrs. Scrapp—Whenever my husband and I get into an argument, send the children out of doors.

Mrs. Rapp—That's right. Free air is a good deal better for the children than hot air.

#### Marvelous

Bobby—This sailor must have been an acrobat.

Mamma—Why?

Bobby—Because 'the book says "Having lit his pipe, he sat down on his chest."

## HOW BLOOD IS MADE.

The liquids and the digested foods in the alimentary canal pass through the wall of the canal into the blood. This process is called *absorption* and takes place chiefly from the small intestine. After absorption the blood carries the food through the body and each cell takes from the blood the food it needs. A purgative extract made from bloodroot, mandrake, stone, queen's root and golden seal and sold by druggists for the past forty years under the name of Dr. Fierco's Golden Medical Discovery, gives uniformly excellent results as a tonic to help in the assimilation of the food and in the absorption by the blood of the food it requires. It eradicates the poisons from the blood with this alternative extract which does not shrink the white blood corpuscles, because containing no alcohol or other injurious ingredients. Thus the body can be built up—strong to resist disease. This is a tonic taken from Nature's garden that builds up those weakened by disease.

Dr. Fierco, founder of the Invalids' Hotel at Buffalo, N.Y., has received many letters similar to the following:

Mrs. FRED R. MURDO, of Paradise, N.S., writes: "I take great pleasure in writing you as regards my case and its cure. In September I was taken with Typhoid Fever, which put me in a dreadful condition. I was weak, run down, nervous and was reduced to a mere skeleton. I had tried most everything I could get but nothing did me any good until, at last, I was advised to try Dr. Fierco's Golden Medical Discovery, and 'Pleasant Pellets,' which I did. Before I had used one bottle I saw a great improvement and when I had used this treatment two months, using only a few vials of 'Pleasant Pellets,' I returned to perfect health. I cannot find words to express my thankfulness for this wonderful medicine. I advise all sufferers to write to Dr. F. V. Fierco, as he cures when others fail."

**Our Knotter Never Misses**

Think what satisfaction there is in knowing that no matter how strenuously the knotter on our No. 3 is worked, it will tie every sheaf. Tested repeatedly under every condition, it has proven itself the surest and best.

Binding attachment can be regulated to tie any size bundle. We guarantee our binder for one year against defective construction and workmanship. So you see every part must do its work properly or we are the losers.

**The No. 3. Binder.**

Like all other Frost & Wood implements, is made in a NEW plant. Unlike others, we've no obsolete machinery side by side with the latest. Everything is modern in our factory. Furthermore, we exercise minute care in selection of materials. Everything, to the smallest bolt must be first-quality, even when cost is higher than others deem necessary. And the patterns we use are what our 70 years' experience has demonstrated will longest withstand the heavy work and rough usage connected with Canadian farming. Get Binder Catalogue and thoroughly post yourself on the Improved No. 3.

**THE FROST & WOOD CO. Limited**  
SMITH'S FALLS CANADA

**Roller Bearings Lessen Draft**

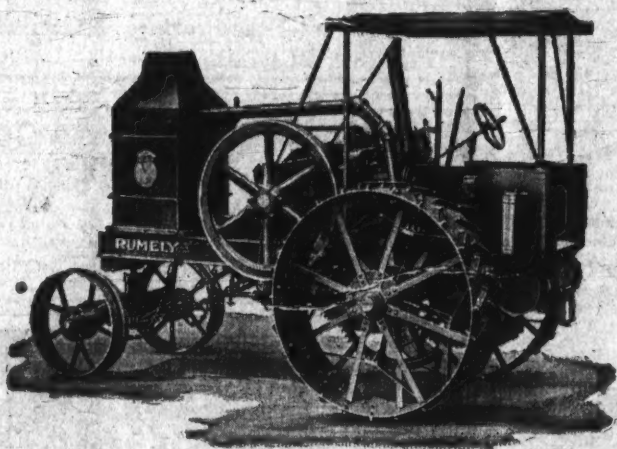

The horses rejoice at the wisdom displayed by the builders of Frost & Wood No. 3 Binders in providing Large Roller and Ball Bearings at every point where wear would otherwise occur. If your horses could speak English, they would urge you to buy the easiest-running, lightest-draft Frost & Wood No. 3 Binder.

Eccentric Sprocket Wheel eliminates that "jar" common to other binders when bundle is tied and discharged. Relieves strain from "jar" that otherwise falls on horses, operator and machine. Also makes a neater, tighter bundle and discharges it more quickly and smoothly.
